| Sociology |                         |
| Spanish   | *options                |

# CAREER IN THE MAKING

## MULBERRY UNIVERSITY TECHNICAL COLLEGE OFFERS MUCH MORE THAN ACADEMIC RESULTS

**A**RE you a parent of a student about to enter those critical GCSE years or who is searching for a sixth form that will equip your child with the skills, as well as results, to fulfil their ambitions?

Then have you considered a University Technical College such as Mulberry UTC, located in Bow, E3 – a thriving area bursting with creatives and young professionals?

Schools like Mulberry UTC offer a relatively new alternative to traditional schools and have a unique edge. For a start, UTCs, which focus on those key years from 14 to 19, are career-focused specialists. This means they offer expert teaching and the sort of impressive facilities you might expect to find in universities rather than

schools. They also offer a mix of academic and technical pathways. As a result, students gain practical, hands-on experience while they learn, equipping them with skills employers want, as well as the academic results for university.

But what really sets UTCs apart is the experiential learning. UTCs work closely with key employers so students benefit from on-the-job work placements and learning experiences you will not find anywhere else.

Mulberry UTC, which opened its doors in 2017, has two specialisms: health careers and the creative industries.

Supporting industry partners include Bank of America Merrill Lynch, the British Film Institute (BFI), Goldsmiths University of London, Mulberry School for Girls, the National Theatre and Barts Health NHS

Trust. Student Tanzina, studying Health and Social Care sums up what is on offer, saying: 'Mulberry UTC has a replica hospital suite, care suite and amazing facilities giving me the opportunity to learn practically.'

'I've had the fantastic opportunity to work with NHS professionals and once a week I go to the Royal London hospital to work in the renal department.'

Aspiring midwife and Mulberry student Maryam adds that these work placements can help when securing a place at university as it enables you to show your 'passion'.

'I was able to shadow a community midwife, attending home visits, observing the way postnatal advice is provided and carrying out the heel prick test to test for any disabilities or severe health conditions.'

### JOIN A FAST-GROWING SECTOR

THE UK's creative industries, including theatre and the performing arts, are growing at almost twice the rate of the wider UK economy. With many digital and media businesses based in East London, Mulberry UTC is ideally located to find work placements for its students. But what sets it apart is its links with the National Theatre and the BFI.

'We have students taking the Level 3 Diploma in Digital Media, who can work on BFI projects, like the Future Film Festival, gaining experience to complement the technical and academic learning we offer here,' says principal Alice

Ward. 'Students can take advantage of our relationship with the National Theatre to learn from professionals working in all aspects of technical theatre and production including stage management, sound and video projection. We offer industry-standard facilities. These include a 250-seat theatre as well as a studio theatre, a TV and film studio with green screen, recording, radio and animation studios and construction workshops and edit suites.

These give a realistic learning environment, boosting students' chances of getting a place on a top degree course or an apprenticeship, and of working in their chosen field.'
